About the conference

The objective of the conference is to provide a common platform for scholars/Researchers/scientist to interact with each other and facilitate an exchange of views in the field of Methods & Applications of Geospatial Technology in Sustainable Development. It is aimed at making scientific collaboration possible in respect of emerging ideas and technologies. The deliberations will be centered on the major challenges before us pertaining to indiscriminate exploration of natural resources, global climate change like: water, environment & ecology, forest, agricultural, mineral etc. The population in India is growing at a very high rate and resources are limited. Therefore, to make the youth aware to sustain our Natural resources with latest Geospatial Technology the conference is going to be organized.

About the Institute
